# New SOTRAFILM BLACK Mulching film

Manufactured with last generation Polyethylenes  
(METALLOCENES)

- Greater Tear Resistance
- Greater Impact Resistance
- Traction and Elongation at break Increment
- Higher mechanical properties

## **New Tunnel film: PLASTERMIC PLUS STRAWBERRIES /BERRIES.**

**Manufactured with last generation polyethylenes (METALLOCENES) and new additives:**

- **Higher Tear Resistance over the film and folds**
- **Higher Impact Resistance –unfavourable weather conditions-**
- **After years of experience the optical properties have been adapted to the yield and area.**

# DURABILITY

The Tunnel film **PLASTERMIC PLUS FOR STRAWBERRIES / BERRIES** has been reinforced with special additives against:

- Degradation by UV solar radiation
- Degradation by structure contact (thermic stability)
